

SBI Fine Chemicals Inc.

Specialists at Continuous Processing

Proprietary Process Intensifying Continuous Flow-Through Reaction (PICFTR) systems

Continuous Process Development & Manufacturing

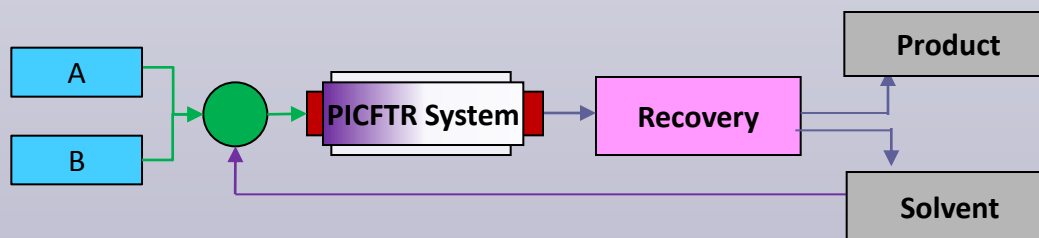

- We routinely convert medium scale (up to 500 kgs) batch reactions to continuous flow production.

Reactor Design & Technology Transfer

- We design specific reactors and equipment to match the process requirements.

Scalable Continuous Processing (1 mL to 5 L/min)

- We integrate process intensifying continuous reactions & processing technology, allowing rapid scale up to multi-kilogram quantities.

Reaction Types

Azidation
Cross Coupling
Cyanation
Fluorination
Hydrogenation
Nitration
Oxidation
Reduction

Process Integration

Neutralization
Extraction
Distillation
Isolation
Solvent Recovery

Compatibility

- 80 °C
+ 250 °C
2000 psi
Moisture Sensitive
Organometallics
